### REASONS FOR ALLOWENCE

1. The following is an examiner's statement of reasons for allowance:

Examiner has carefully considered Amendment dated 06/18/2008 and reviewed all pending **Claims 16-23 and 39-51**.

The current application is directed towards load balancing in an information system, constituted by a plurality of application servers and one or multiplexed database servers, which provide web pages from database server through various application programs initiated by user request, and the load control process controlling response time for fulfilling user request within a permissible range of time and also load control process balances load that is appropriate for both the application servers and the database at the same time.

**Independent Claims 16 and 51, disclose** method for controlling bottlenecks in an information system that includes N application servers and a database server, where N is at least 2, wherein each application server is adapted to execute at least one application program for processing a transaction received by each application server from a terminal, where the database server is adapted to access a database based on a request received from any application server of the N application servers, and monitoring a processing time required for each application program to process the transaction received by each application server; detecting a bottleneck relating to usage of at least one resource, where each resource of the at least one resource is independently selected from the group consisting of a resource of at least one application server of the N application servers, a resource related to input to

the transaction, a resource of the database server, and a resource related to the transaction, where said detecting is responsive to said monitoring having determined that the processing time for processing the transaction by I application servers of the N application servers is not within a predesignated permissible processing, where M denotes a predesignated threshold number of application servers, where said detecting the bottleneck relating to usage of at least one resource comprises identifying the at least one resource, and where said identifying the at least one resource comprises independently identifying each resource of the at least one resource as being: said resource of at least one application server of the N application servers if I is at least 1 and does not exceed M and if a processing time for processing another type of transaction by any application server of the N application servers is not within the predesignated permissible processing time range.

One of the prior art of records, Garg discloses various methods and apparatus for efficiently allocating resources which are automatically reconfigured for optimizing requirements and adjusting load balancing policies to plurality of applications. Where the system is modeled as an open queuing network, with three tiers, web servers to an application servers to a database servers arranged in series, and parallel, identical servers within each tier.

Garg is silent to the idea of the processing time required for each application program to process the transaction received by each application server. Garg teaches mean times and does not teach individual times and discloses sum of average service

demands in terms of various parameters, none of which being a processing time or a response time of each application program.

Upon an updated search of the prior art, no significant sources were located that teach or suggest, monitoring a processing time required for each application program to process the transaction received by each application server, in combination with all of the claim limitations of each independent claim.

Thus the prior art of record neither render nor anticipate the claimed invention. Therefore, all pending claims are allowed.

### ***Conclusion***

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
